

Command Style-A

Description of a Command Style*

What classroom image would you see between the teacher and learners that would indicate the structure of the Command Style?

In the Command Style the teacher makes all task decisions and the learners practice/perform in unison, in a choreographed, precision performance on cue following the exact pace and rhythm set by the teacher.

* Teaching Styles A-E engage the learners in practicing tasks that rely on reproduction cognitive operations. The content in these styles may be new to the learner, a review, a practice or a test of previously experienced content.
